QUICK-INSTALL METAL STUD

Product Specifications

Shape: 34*34mm special shaped square tube

Material: 1.Galvanized steel sheet
2.Zn-Al-Mg coated steel strip

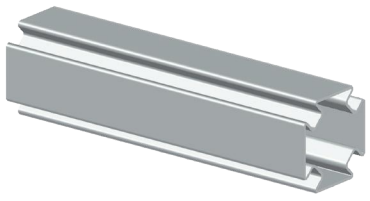

Thickness: 1.0mm

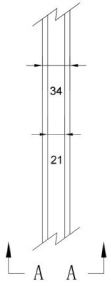

Length: Adjustable according to actual needs

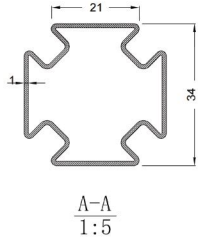

Production Process: Roll forming + laser welding

Effect: Used for keel foundation structure construction

Product Physical

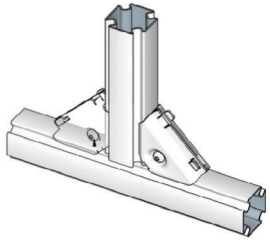

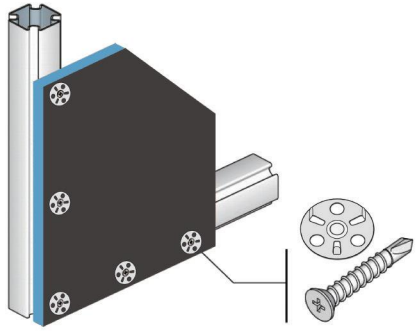

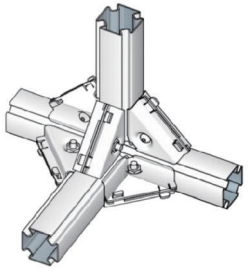

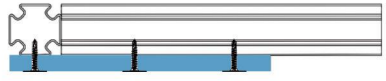

Product Advantages

- **Product qualification: EU CE certification**
- **Core Concept: Prefabricated quick-installation system solution**
- **Fast construction**
- **Flexible adjustment**
- **Multi-scenario application**
- **Environmental protection and cyclic utilization**
- **Suitable for XPS composite board**

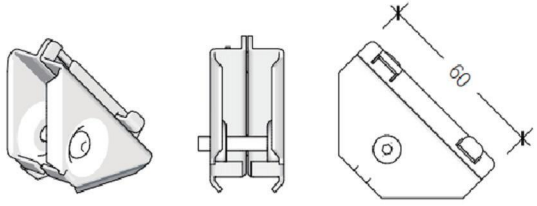

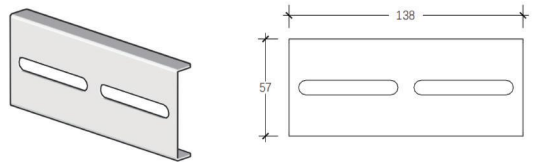

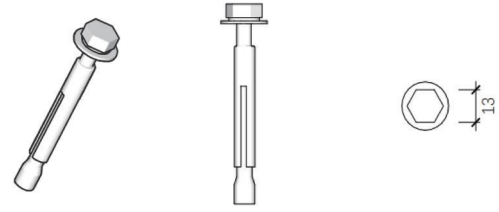

Main Accessories

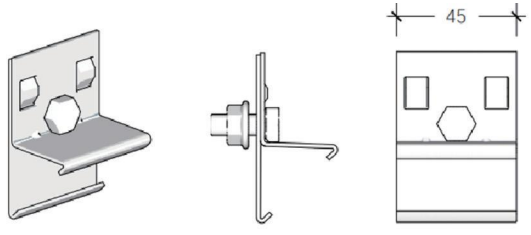

Corner connector

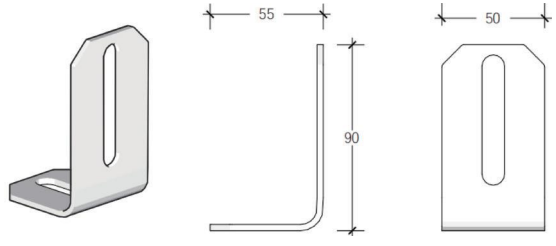

Parallel connector

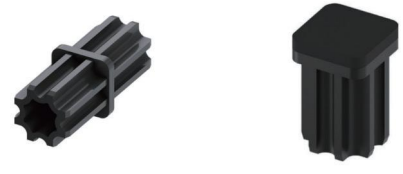

Expansion bolts

Adjacent claw

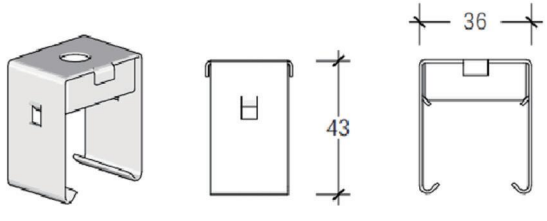

Anchor connector

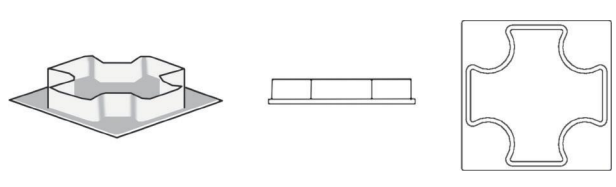

Straight pipe connector

End cap with rubber layer

Double direction claw

Main profile end cap

Support feet

Applications
